**HYPERIMMUNE EGCELL™:
BIOCHOICE® AND IMMUNE²⁶**

SUMMER 2002

Inside this issue:

The Royal Center of Advanced Medicine (“RCAM”) has commenced “**Project Immune Frontier**” to significantly improve immune system competency in our patients. To achieve this goal, we have developed a protocol for hyperimmune egg protein

designed to be. Thus, with **BioChoice®**, we believe that it is possible to do two things:

1. shift the health care emphasis from disease management to disease prevention and human health promotion; and

Alkaline pH: A Case Study	2

oped a protocol for hyperimmune egg protein, contained in both **BioChoice® Immune Support** and **Immune²⁶**, for our RCAM patients. This protein contains 26 antibodies to human viruses and bacteria. It was developed by administering human vaccines to chickens. The antibody was produced by the chickens and transferred into the eggs they laid. Consuming these eggs gives us passive antibodies that have specific activity against human germs. This patented product is a real breakthrough with solid scientific evidence documenting its effectiveness to support and balance our immune systems.

We believe that, with a competent immune system, our bodies will properly heal. Consequently, bodily functions will be rejuvenated and regenerated and physical dysfunctions will be repaired, as they are genetically

health promotion; and
 2. live a disease-free, vibrant and healthy life.

BioChoice® History

The **BioChoice®** breakthrough is the result of a 20-year, \$50 million double-blind placebo clinical and human trial research and development program. DuPont and ConAgra, two of the most successful processing and food producing companies in the world, funded this research. Ultimately, a \$200 million biotechnology unit of these companies, seeking natural solutions to disease, brought us a worldwide patented, natural, immune system-balancing product.

The United States Army, as well as Albert Einstein Medical Center, New York Hospital, the Harvard University Medical Center and the Government of India, are among those organizations that have conducted successful clinical trials using **BioChoice®**. As a result, **BioChoice®** is being

To achieve optimum health, maximize immune potential

recommended to patients worldwide in a variety of practice settings from offices to clinics to hospitals and medical centers. Additional long-term studies are currently underway.

Patient Cases

1. After 2 days, a 42 y/o physician is able to achieve early 4 a.m. arising.
2. After 1 week, a 19 y/o female student with CFS is more energetic and able to 'walk across campus.'
3. After 1 month, a 50 y/o female is recovered from pneumonia, breathing normally, without coughing, and is more energetic.
4. After 3 months, a physician suffering from avascular necrosis of the hip is pain-free within 3 months.

MORE FACTS

- ◆ 85% of all hospitalizations are for disease-related causes not injuries.
- ◆ 70% of all deaths, which come from heart attack, cancer, stroke and chronic lung disease, can be prevented and, in some cases, even reversed.
- ◆ According to Helen Greenblatt, Ph.D., patients can monitor their response to hyperimmune egg protein via energy improvement.
- ◆ **Legacy for Life**, the **BioChoice®** parent company, has over 100 worldwide patents and patent applications on the **Immune²⁶** technology.
- ◆ **Immune²⁶** is listed in the 1992 Physicians' Desk Reference for Nonprescription Drugs and Dietary Supplements.

RCAM Protocol

1. Combine 1 scoop each of **Bio-Choice® Immune Support & Immune²⁶** in liquid (e.g., rice or goat milk, fruit juice, etc.). Shake vigorously or put in blender. Flavorings, fruits, ice, etc. may also be added.
2. After 3 months, reassess your progress.
3. Use for ≥ 6 months.
4. Consider lifetime maintenance!

ALKALINE PH: A CASE STUDY

By age 28, Deidre Howard had it all—finished college, great marriage, three wonderful girls, and a busy career in the health field as a practicing nutritionist. However, she lacked only one thing—her own health! Her body suffered from repeated bouts of pneumonia, pericardi-

GET MORE BASIC

The modern approach of allopathic medicine is based on Louis Pasteur’s idea that disease comes from germs which invade the body from the outside. Conversely, Pasteur’s contemporary, Antoine Bechamp, said just the opposite: disease results from within the environment of the body itself. While Pasteur’s philosophy ultimately won out, both men were right. However, it is the latter philosophy that makes more sense in this modern era.

To illustrate, imagine your body as a fish tank. Think of the importance of maintaining the integrity of the internal fluids of the body that we “swim” in daily. Now, imagine the fish in this tank are your cells and organ systems bathed in fluids, which transport food and remove wastes. What if we throw in too much food or the wrong kind of food and the fish are unable to consume or digest it all? It will start to decompose and putrefy. Toxic waste and chemicals build up as the food breaks down, creating acidic byprod-

ucts, altering the optimum alkaline pH.

Basically, this is a small example of what we may be doing to our internal fluids every day. We are fouling them with pollution, smoking, drugs, excessive intake of food, overconsumption of acid-forming foods (e.g., dairy, sugar, animal protein), stress, and any number of transgressions which compromise the delicate balance of our internal alkaline fluids.

In short, over-acidification interferes with life itself leading to all sickness and disease. Conversely, a balanced internal alkaline environment will increase energy, eliminate allergies and normalize weight. That’s right, the body creates fat cells to store acids so your vital organs don’t have to. Thus, alkalizing promotes both health and weight loss!

To achieve an optimum body pH, meet with a nutritionist at **RCAM**. Call **433-8800** for an appointment.

SUPERGREENS®

her own health! Her body suffered from repeated bouts of pneumonia, pericarditis (inflammation of the heart), kidney stones, severe depression, and anxiety. Further, for eight years her weight had hovered around 226 pounds. At one point, her cholesterol was 280 mg/dl.

While searching for solutions to her own health problems, Deidre discovered that, by harnessing the power within the human body, she was capable of accomplishing great things. Her discovery led to an 85-lb. weight loss in 10 months. In addition, she no longer required medications for anxiety and depression. Moreover, the recurrent bouts of pneumonia, kidney stones and pericarditis stopped occurring. She also found she had more energy and passion for life. How was Deidre able to do all of this? By balancing her body pH.

Today, Deidre works closely with Robert Young, Ph.D. In fact, her picture is featured on the back cover of Dr. Young's new book, The pH Miracle. Her before and after weightloss pictures are there for the whole world to see.

As a result of her own experience, Deidre not only understands the importance of balancing the body's pH system for herself, but she has helped hundreds of clients do the same. Through use of darkfield microscopy, she is able to assess her clients, as well as monitor their progress, via both live blood and dry cell analysis. Further, she has developed a 6-week dietary regimen to promote pH balance. For more info, or to make an appointment, call **RCAM @ 433-8800**.

- ✓ More than ordinary green powders
- ✓ 49 grasses, spouted grains, and vegetables
- ✓ 125 vitamins, minerals, and amino acids
- ✓ Patented Process increases charge

PRIME PH®

- ✓ Catalyzes H₂O in blood to improve hydration
- ✓ Catalyzes O₂ in blood to improve oxygenation
- ✓ Alkalinizes the body pH

Getting Alkalinized Takes Your Body To Another Dimension.

DARKFIELD MICROSCOPY

Everyone knows that you can observe your blood under a light microscope. What everyone does not understand is that there is more to see than just red blood cells (RBCs) and white blood cells (WBCs). For example, with a darkfield microscope we can see organisms that are smaller than either RBCs or WBCs. This is because a darkfield microscope has a stronger condenser that allows for greater magnification ($\geq 1000X$).

These smaller organisms ("symbionts") have a unique life cycle that varies in appearance (known as "pleomorphism"). The life cycle of symbionts depends on whether the internal milieu of your body is in either a state of symbiosis (mutual interdependence) or pathogenesis (disease). Conditions that

contribute to pathogenicity, and more virulent organism formations, include heavy metals, stress, and an acid pH. In fact, some German medications (SANUM homeopathics), designed to return pathogenic organisms back to a state of symbiosis, work best in an alkaline environment. For this reason, a base powder is often recommended to be taken simultaneously.

An alkaline pH can be achieved through using base powder (Quat Carb), base tablets (Nema Base), Supergreens, Prime pH, and dietary choices. Monitor your progress by measuring your first morning urine with litmus paper (pH range 5.0-8.0).

To assess your health status and/or progress, get a darkfield analysis of your blood. Call **RCAM @ 433-8800** for an appointment.
