ATTENTION!

CANCER PATIENTS NEEDED FOR STUDY OF A NATURAL PRODUCT!

Are you a patient with **LUNG, COLON, or BREAST** cancer who is receiving chemotherapy? If so, you may be eligible to participate in a simple research study using a *natural product*. This product is being studied for its ability to reduce chemotherapy side-effects and stimulate immune function. All you need to do is take a sublingual powder and complete a questionnaire once monthly for three (3) months. In exchange for your participation, we provide you with the product and a \$25 gift certificate to Whole Foods for each questionnaire you complete. **FOR MORE INFORMATION, PLEASE-CALL (702) 476-0000.**

“Anyone with a herniated or degenerative disc should try VAX-D FIRST BEFORE SURGERY”

Robert Channey, MD former assistant Surgeon General for the USA.

crease with movement. This type of pain can be felt as sharp or knife-like pain, a burning sensation, or as a dull muscular ache. Symptoms can range from mildly uncomfortable to completely disabling.

VAX-D

If you have been diagnosed with this type of pain, **New Hope Medical Center (“NHMC”)** has therapies that can work for you. One of these is known as “VAX-D”, which is short for “Vertebral Axial Decompression”. VAX-D is a patented, non-surgical therapy clinically proven to be a successful conservative treatment for chronic low back pain and sciatica, caused by bulging, herniated or degenerative discs, and facet syndrome. Even post-surgical patients and those suffering from stenosis (a narrowing of the spinal canal) have reported a significant pain relief from VAX-D treatments.

Have you had problems with your neck or back? Have you been told that surgery is the only answer? If so, VAX-D is highly effective for neck and back disorders. After a series of relaxing VAX-D treatment sessions, patients experience powerful pain reduction and healing. Some even notice an improvement in their symptoms after the first few treatments!

VAX-D, should never be confused with traction! VAX-D lengthens and decompresses the spine, reversing high intradiscal pressure through the application of negative pressure via a patented slow “ramp-up” process. This reversal of pressure creates a vacuum inside the discs that not only takes pressure off of pinched nerves, but helps to reposition bulging discs and pull extruded disc material back into place. Spinal experts believe that nutrients, oxygen, and fluids are drawn into the disc to create a revitalized environment conducive to healing.

VAX-D treatments are fully automated. Because the VAX-D operates via a computer software program, treatments can be designed to meet the specific needs of each patient. The purpose of VAX-D is similar to that of prolotherapy, which directs healing to areas of injury by introducing a localized inflammation through injection that attracts fibroblasts, which, in turn, produces collagen needed for soft tissue repair.

CHRONIC PAIN

Do you suffer from pain? If so, you are not alone. It is estimated that 33% of the U.S. population, or as many as 70 million Americans, suffer from some sort of chronic pain. **It disables more people than cancer or heart disease and costs the American people more than both combined.** Medical costs for pain in the U.S. are estimated at \$100 billion a year in medical costs, lost working days, and workers compensation

BACK & LEG PAIN

Chronic back and leg pain is described as pain that is felt in the back and/or leg. This may result from spinal diseases including: degenerative disc disease, failed back syndrome, lumbar disc herniation, osteoporosis, spinal stenosis, and sciatica. Back pain is often located in the lower back, but it may extend to other areas, such as the thighs, calves, and feet.

NECK PAIN

Chronic neck pain is described as pain that is felt in the neck, shoulder, and/or head areas. Like back pain, neck pain may result from disc herniation, spinal stenosis, and osteoporosis. However, it may also result from trauma, whiplash from motor vehicle injury, and headaches. Neck pain may extend to such areas as the head, eyes, upper back, shoulders, arms, elbows, wrists, hands, and fingers.

SYMPTOMS

Affected areas in the neck and back may feel tender or sore to the touch, and the pain may in-

(Continued from page 1)

However, VAX-D is able to go where prolotherapy cannot by directing healing to the discs between the vertebrae that are unaccessible to injections.

INVENTION BORN OF NECESSITY

Allan Dyer, M.D., Ph.D., is the inventor and founder of the revolutionary VAX-D technology. As former Deputy Minister of health in Ontario, Canada, one of Dr. Dyer's many contributions to health sciences include his extensive research that led to the development of one of the most vital medical tools used in every hospital emergency room around the world: the heart defibrillator.

Dr. Dyer's own experience with back pain began when he himself was debilitated by a herniated disc. After conventional treatments failed, Dr. Dyer was driven to create a solution of his own and formulated the theories that led to the design and development of VAX-D. After spending more than six years in research and development with a team of physicians, engineers, and technicians at major teaching hospitals, Dr. Dyer introduced VAX-D in 1991. Happily, Dr. Dyer successfully used his invention on his own injured disc and he has now been able to walk pain-free ever since.

NHMC'S PAIN PROTOCOL

NHMC's treatment protocol combines VAX-D with intravenous nutrition, electromagnetic stimulation, and ionized oxygen.. This combination works synergistically to naturally repair the body and regenerate new tissue. In this way, the body is not only relieved from pain, but stronger, healthier, and less susceptible to further injury. As a result, patients are then able to return to normal activities without the

**ANTI-AGING
FEEL-YOUNGER
CLUB MEMBERSHIP**

NHMC is NOW providing a special offer for those who wish to FEEL BETTER, HAVE MORE ENERGY and achieve better emotional balance through bioidentical hormone replacement. NHMC patients and other interested members of the public can now join our membership club for bioidentical hormones. In this way, we can better service the needs of our patients. The cost of membership is \$40/month or \$400/year. However, this cost is easily recaptured through discounts for hormones prescribed or sold from NHMC. Below is a list of some club member benefits:

Discount Prices. Club members receive discounts on all prescription hormones obtained either from Specialty Solutions or NHMC;

Free Monthly Pass. A free pass is given to club members for a medical sauna, steam bath or contrast shower at NHMC (Mar. '08).

Personal Monitoring. A patient care coordinator closely monitors follow-up for club members (e.g., office visits, lab testing, etc.);

Group Research. Club members will be given the opportunity to participate in group meetings and research where bioidentical hormones are discussed or studied.

**START THE NEW
YEAR OFF RIGHT!
MEDICAL WEIGHT
LOSS IS THE ANSWER
FOR YOU!**

NHMC has developed a proprietary program to help its patients with real weight loss. Weight loss is a difficult proposition for most everyone because, in order for weight loss to have a lasting effect, more fat than muscle must be lost. If this does not occur then weight loss, such as that done strictly through dieting, lowers metabolism. This is the opposite of what a patient needs. In fact, a lower metabolic rate assures that all weight will return (plus some extra)! This is known as the "yo-yo phenomenon". In order to avoid this, several factors must be considered:

1. **Hormonal Evaluation;**
2. **Food Sensitivity Testing;**
3. **Energy Assessment;**
4. **Exercise Recommendations;**
5. **Dietary Guidelines; and**
6. **Medical Support.**

Get started today and call (702) 476-0000.

**HOW MUCH
CANDIDA DO YOU
HAVE?**

Candida Albicans is a yeast-like fungal organism found in small amounts in the normal human intestinal tract. Normally, Candida is kept in check by the body's own intestinal bacteria. However, Candida can increase in numbers when this balance is disturbed to cause a condition known as "candidiasis" of the intestinal tract, or yeast infections of other parts of the body. Candida overgrowth may result from long-term or repeated antibiotics, birth control pills, and amalgam fillings.

Candida can best be evaluated by obtaining a blood test for Candida Antibodies (e.g., IgA, IgM, and IgG). The most important antibody is IgA because it is associated with the gut and mucosa of the body. IgM and IgG antibodies help to indicate whether an infection is due to recent or past exposure, respectively.

The concern with Candida is that it can cause and/or exacerbate food sensitivities. It is also associated with the etiology for chronic fatigue syndrome. Treatment for Candida typically requires an anti-fungal. NHMC has a Gut Cleanse Protocol that includes not only an anti-fungal but good bacteria, special silver solution, anti-Candida biologicals, and Psyllium Husk. Often, the protocol must be repeated monthly for three or more months. Candida antibodies should be retested periodically to monitor the patient's progress.

**SEIGEN
GOT YOUR LIFE
FORCE?**

Seigen is a fermented lactobacillus acidophilus that is the result of 70 years of research by leading Japanese nutritional scientists. It is available in different strengths and for different purposes. For example, there is one type of Seigen formulated for joint problems and another for gut problems. Alpha Seigen, the most potent form, is recommended for immune weakness and cancer.

To screen for whether you have an immune weakness, NHMC can blood draw to obtain a complete blood count. This provides a total lymphocyte count. Ideally, total lymphocytes should be ≥ 1200 cells/cmm³.

Seigen can also be taken as a preventive measure. It is better to prevent diseases than to treat them after they have developed. For those who are genetically predisposed to cancer, Seigen may be taken preventatively to promote and maintain good health.

Typically, Seigen is administered sublingually as a powdered packet. For best results, take one packet three times daily. However, cancer patients should take at least three packets of alpha Seigen three times daily. For health maintenance, its regular use will revitalize all of your body systems like no other dietary supplement. Call NHMC AT (702) 476-0000 to order your own Seigen today!
